What Makes AMN ACS Unique?

Facility Coding Methodology: Our robust intervention facility coding methodology ensures we accurately capture resource utilization in the emergency department (ED) often improving per-chart revenue.

Reporting and Analytics: A full reporting suite offers transparency at all levels. See the big picture with reviews on monthly volume and coding quality. Identify revenue opportunities from gaps in coding and infusions without end times. Even spot outliers in the coding process with facility and provider comparison reports.

AMN 100% Pre-Bill Audit: This does exactly what the name says. It provides an automated review of all coding before billing. Far more effective than random auditing, it examines each case and determines the likelihood it could change, estimates the financial impact, and recommends corrections. In turn, auditing efforts can then focus on the cases that return the most revenue.

What makes AMN 100% Pre-Bill Audit unique?

Easily Prioritize Cases: By analyzing 100% of cases, you can prioritize auditing efforts to only those cases that yield the most financial impact.

Flexible yet Robust: Rules can be turned on or off, customized, or built from scratch to support unique needs. Robust reporting delivers insight on a wide variety of metrics to drive operational and financial improvements.

Together Advanced Coding Solution and 100% Pre-Bill Audit help improve healthcare reimbursements so that providers can ultimately focus on what they do best, deliver exceptional care to patients.
